

# **CONSTRUCTION UPDATE!**

The Tacoma Lutheran Healthcare Center new interior décor project began February 9th, 2009.

Areas involved include Mountain Station, the Rehabilitation Area, Ocean Station, and the Service Center. These areas will be repainted and wallpapered in various warm colors and textures. New flooring will be installed as well. Each nursing station will be remodeled to allow more efficient service for residents and better areas to work for our staff.

A new entrance to the main facility will be constructed as well. This area will be more centrally located between the apartments and the healthcare center. This portion of the remodel began March 9th, 2009.

Many offices, departments and activities have been relocated or diversified to enable more locations for residents to visit and utilize as needed.

We are also ecstatic about construction of the Emerson Wellness and Clark Aquatic Center! This project will begin soon. This facility will be located on our west campus near the independent apartments and the Westgate condo-style homes.

All of our projects are anticipated to be completed by the end of the Fall of 2009. Watch our website for updates!

If you have any questions about our construction project, please email: [greatday@tacomalutheran.org](mailto:greatday@tacomalutheran.org)

Have a great day!
